

Project Initialization and Planning Phase

Date	26 June 2026
Team ID	
Project Name	Voice-Based Concept Understanding Analyser (VBCUA)
Maximum Marks	3 Marks

Define Problem Statements :

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	I'm trying to	But	Because	Which makes me feel
I am A student preparing for interviews A student preparing for presentations A trainer evaluating spoken understanding An educator assessing students A student preparing for academic vivas A learner practicing self-improvement	I'm trying to Explain a concept clearly Speak with confidence Evaluate spoken understanding at scale Track improvement over time Get objective feedback on delivery	But I have no reliable way to check accuracy I have no way to measure fluency Manual evaluation is inconsistent Feedback is rare or vague No scalable assessment tool exists	Because Traditional feedback is unavailable Feedback is too subjective Written tests ignore spoken delivery Manual grading is time-consuming No unified content-plus-delivery check exists	Which makes me feel Uncertain about my understanding Anxious before interviews Unable to track improvement Overwhelmed by grading workload Unsure if feedback is fair

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A student preparing for interviews, presentations, or academic vivas.	Explain a concept clearly and confidently through spoken communication	I have no reliable way to know if my explanation was conceptually correct or well-delivered	Traditional feedback is either unavailable, too subjective, or too narrow (only checking written content, not spoken delivery)	Uncertain about my actual understanding, anxious before interviews/presentations, and unable to track improvement over time

PS-2	An educator or trainer assessing multiple students' spoken understanding	Evaluate how well students grasp and articulate a concept verbally	I have no scalable, objective tool to assess spoken explanations consistently across students	Manual evaluation is time-consuming, subjective, and difficult to apply consistently at scale	Overwhelmed by manual assessment workload and unsure if feedback is fair and consistent across all students
